

ANDRII SOKUR

SOLUTIONS ANALYST | DATA ANALYTICS | BUSINESS INTELLIGENCE

Dublin, Ireland | +353 85 756 3449 | a.sokurbox@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Solutions and BI Analyst with 4+ years of experience translating business and operational requirements into reliable reporting and data solutions. Skilled in Power BI, SQL, DAX, Power Query and Python/pandas, with hands-on experience in data modelling, reconciliation and quality controls for large, sensitive datasets. Partners with business, operations and technical teams across requirements definition, testing, delivery and documentation.

CORE SKILLS

Business & Process Analysis: requirements elicitation, process mapping, functional specifications, stakeholder management, user stories, acceptance criteria, Agile delivery

Data & BI: Power BI Desktop/Service, SQL, DAX, Power Query, Python/pandas, Excel, data modelling, dashboards

Quality & Delivery: data quality, validation, reconciliation, KPI definitions, Jira, SIT/UAT, defect tracking, technical documentation

Exposure to: Azure Data Factory, Azure DevOps, Microsoft Fabric, Dataflows Gen2, Lakehouse/Warehouse

PROFESSIONAL EXPERIENCE

Business Intelligence Consultant | New Vision Agency | Dublin, Ireland Nov 2024 - Present

- Gathered and clarified business, reporting and data-flow requirements with stakeholders, defining measures, filters and acceptance criteria before translating needs into Power BI and SQL solutions.
- Built reusable Power BI models and dashboards with Power Query, DAX and SQL-prepared data for manpower planning, project health, forecasting and billable analysis, reducing manual reporting effort by approximately 60%.
- Reconciled source files, SQL outputs and dashboard totals, using Python/pandas validation checks to identify missing, duplicate or inconsistent records before publication.
- Managed Power BI Service workspaces, refresh schedules and access controls, and presented recurring management views and analytical findings to business users.
- Used Jira to track requirements, SIT/UAT findings, defects and delivery progress; documented test cases, metric logic, assumptions, sign-off and handover.

Consolidated Information Analyst | Ukrainian Red Cross Society | Kyiv, Ukraine Jul 2023 - Nov 2024

- Consolidated inputs across seven departments for nationwide humanitarian programmes and more than 50 internal users, coordinating programme, operations, field and information-management teams.
- Developed Power BI dashboards for beneficiary reach, regional coverage, programme delivery, service volumes and partner contribution after clarifying user needs and KPI definitions.
- Analysed, modelled and validated sensitive datasets containing more than 300,000 records to identify trends, coverage gaps and operational risks.
- Built DAX measures, Power Query transformations, date logic and geographic filters, establishing reusable KPI definitions across departments and periods.
- Reconciled submissions from departments and regions, resolving missing, duplicate, inconsistent and incorrectly classified records before figures were released.
- Implemented repeatable validation controls for recurring analytical outputs, strengthening the consistency and usability of humanitarian information.
- Documented data flows, calculations, assumptions and access requirements, and communicated findings, data gaps and coverage risks to senior and non-technical audiences.

Business Analyst Intern | Room 8 Group | Kyiv, Ukraine

Jan 2023 - Sep 2023

- Gathered and documented ERP and business-process requirements, analysed existing workflows and translated business needs into functional specifications.
- Prepared Camunda process maps, user stories and acceptance criteria, collaborating with business users, developers and QA to clarify scope and outcomes.
- Used Jira to track requirements, tasks, defects and delivery progress, supporting prioritisation and transparent Agile delivery.
- Supported testing, UAT, implementation and rollout; prepared user guidance and delivery documentation for handover.

Data Analyst Intern | AUTODOC | Kyiv, Ukraine

Nov 2021 - May 2022

- Collected, cleaned and validated operational and transactional data from multiple sources across European markets, using SQL, Excel and Power Query to prepare structured datasets and recurring analysis.
- Investigated discrepancies across product, customer, order, revenue and operational data, and developed repeatable validation and reconciliation checks to identify data-quality and process issues.
- Supported KPI monitoring, documented analytical logic, metric definitions and assumptions, and translated findings into practical recommendations for business stakeholders.

Aircraft Landing Gear Design Engineer | ANTONOV Company | Kyiv, Ukraine

Oct 2020 - Sep 2021

- Conducted technical inspections and condition assessments of aircraft landing gear systems, identifying defects, wear, damage and components requiring repair or replacement.
- Performed engineering calculations to select landing gear configurations and components for the safe relocation and transportation of aircraft.
- Developed and modified landing gear components and CAD drawings, maintained accurate technical documentation and collaborated with engineering and maintenance teams.

EDUCATION

Master's Degree, Maintenance and Repair of Aircraft and Aircraft Engines

2021

National Aviation University, Kyiv, Ukraine | Diploma with Honours; English-taught programme

Bachelor's Degree, Maintenance and Repair of Aircraft and Aircraft Engines

2020

National Aviation University, Kyiv, Ukraine

BSc Mechanical Engineering

2019

University of Dunaújváros, Hungary
